

Microsoft Power BI: UX Design

Clean UX designs for faster decision making

Power BI business dashboards and reports can contain an overwhelming amount graphs, dials and tables. This is often the result of not knowing what is and isn't important and it slows users down.

Based on your stakeholder needs we design clean, fit for purpose dashboards and reports. Combine this with optimal data visualisations and your stakeholders will spend less time interpreting data and more time making decisions.

THIS SERVICE HELPS TO...

Spend less time
searching for data

Spend less time
interpreting data

Spend more time on effective
and efficient decision making

WHAT YOU GET

You benefit from our extensive experience in analysing, processing and presenting data. You get a Power BI Build that includes:

- ✓ Data models that supports stakeholders' changing needs
- ✓ Custom connectors to bespoke (internal) data sources such as data from the Internet of things, marketing survey data
- ✓ Optimised Power BI dashboards and forms
- ✓ Pro-active support & maintenance

Microsoft Power BI: UX Design

HOW WE DO IT

1 We build Power BI dashboards and reports according to your stakeholders' specific requirements.

2 We develop Power Queries to extract the core data needed for decision making.

3 We develop custom data visualisations.

4 We conduct regular requirements and data source reviews.

5 Iteratively, we update the build to reflect the latest changes in stakeholder needs and data source availability.

About Akendi

Akendi is a human experience design firm with 16+ years of successful collaborations, leveraging equal parts research-led analysis and inspired creative design. Our multi-disciplinary team of 15+ specialists help your organisation to deliver exceptional experiences and provide strategic insights to put you a step ahead of the competition.

Our Services

We ideate, strategize, research, design, test and construct all aspects of the customer and user experience, ensuring intentional experiences that meet citizen, customer and user needs. Every time.
